PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience building and maintaining production web applications using React.js, JavaScript, Core PHP, CodeIgniter, and MySQL. Developed REST APIs, Cashfree and Razorpay payment integrations, and ERP and e-commerce workflows for a live production platform. Built an LLM-powered database chatbot with role- and hierarchy-based access control using Llama 3.2. Strong in SQL schema design, query optimization, API testing, and production debugging. Currently learning Angular and Java.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, PHP, SQL, Python (data automation and forecasting)

Frontend: React.js (Hooks, Context API/Redux, React Router), HTML5, CSS3, Bootstrap, Ant Design, Responsive Web Design, Axios/Fetch, JSON, AJAX

Backend: Core PHP, CodeIgniter 3 and 4 (MVC), Node.js, NestJS, REST API Development, JWT and Session-Based Authentication

Databases: MySQL, Schema Design and Normalization, Indexing, Query Optimization, phpMyAdmin

PHP OOP: Applied in CodeIgniter: Classes and Objects, Inheritance, Constructors, Access Modifiers. Conceptual knowledge: Encapsulation, Polymorphism, Abstraction, Abstract Classes and Interfaces

Integrations and AI: Cashfree, Razorpay (payments and payouts), Third-Party API Integration, Llama 3.2 (Ollama), Prompt Engineering

Tools and Version Control: Git, GitHub, Postman, Thunder Client

Core Concepts: Web Application Development, Frontend and Backend Development, API Testing, Debugging and Troubleshooting, Code Reviews, Agile, Problem Solving

Currently Learning: Angular, Java

PROFESSIONAL EXPERIENCE

Full-Stack Developer (PHP) *May 2025 – Oct 2026 (serving notice; last working day 23 Oct 2026)*
Genesis Poweronics India Pvt. Ltd., Hyderabad

- Developed and maintained two production applications as part of a 3-member team: a generator-sales ERP system and the live Nutsby e-commerce platform, using Core PHP, CodeIgniter 3 and 4, MySQL, REST APIs, and React.js.
- Integrated Cashfree and Razorpay payment gateways and payout flows, and implemented transaction validation logic for order processing.
- Built Nutsby features including product management, cart and checkout workflows, order processing, and third-party API integrations.
- Built ERP modules covering generator sales, service operations, inventory management, employee records, and order processing.
- Developed backend REST APIs and integrated them with React.js interfaces for consistent frontend-backend data flow.
- Built an LLM-powered chatbot using Llama 3.2 (via Ollama) connected to a business database, allowing users to ask natural-language questions and receive data-driven answers.
- Implemented role- and hierarchy-based access control in the chatbot using session user details, so responses respect organizational roles and data-governance rules.
- Optimized MySQL performance by normalizing tables, adding indexes, removing duplicate data, and creating foreign keys; reduced query slowness by about 50% based on execution times measured in phpMyAdmin.

- Debugged production and development issues, tested APIs with Postman and Thunder Client, executed test cases, and shipped fixes without breaking existing functionality.
- Worked with cross-functional team members on requirements, code reviews, and production support.

Software Developer *Jul 2024 – May 2025*
Schemax Crafts and Solutions, Visakhapatnam

- Built and maintained Warehouse Management System (WMS) modules in the ERP portal of a Bangladesh-based apparel company, covering cutting, sewing, production, and purchasing workflows.
- Developed business screens and reusable UI components in React.js with Ant Design, and integrated them with REST APIs alongside backend developers.
- Built backend services using Node.js, NestJS, and TypeScript for R&D projects.
- Developed a hierarchy-based notification system (Node.js, React.js, REST APIs) that delivers project updates to stakeholders based on organizational hierarchy.
- Built a predictive warning system in Python using the Prophet library to forecast trends and generate warnings from historical data.
- Created a Python utility that processes data and generates Excel reports with embedded charts.
- Debugged and resolved UI and integration issues through structured testing.

Freelance Developer / Self-Learning *May 2023 – Jun 2024*
Independent

- Built a web application for a family-run tailoring shop to manage customer details and orders, organized by delivery date.
- Used this period to build skills in React.js, JavaScript, and full-stack web development.

PERSONAL PROJECT

Basic E-commerce Web Application | *Angular, Node.js, REST APIs*
Self-directed learning project: an e-commerce site with an Angular frontend integrated with Node.js REST APIs.

EDUCATION

B.Tech (Lateral Entry), Mechanical Engineering *2020 – 2023*
Raghu Institute of Technology, Visakhapatnam | CGPA: 8.5
